

Create thematic maps in a few clicks  
with TMap Designer!

**Tmap**  
designer

## TMap Designer is a desktop application to design thematic maps

It has never been so easy to create a thematic map:

- ① Load or create a base map (TMap can import ESRI ArcInfo shape files).
- ② Load data from your data source (TMap supports flat file CSV, dBase, MS-Excel and ODBC database import).
- ③ Define a cartographic display (Points, color patterns, proportional symbols, dot density).
- ④ Configure annotations (labels, titles, legends, etc...).
- ⑤ Copy - Paste the created thematic map into other desktop applications.

Your data

Your base maps

Thematic maps

## 1 2 3 4 5 TMap Designer Process

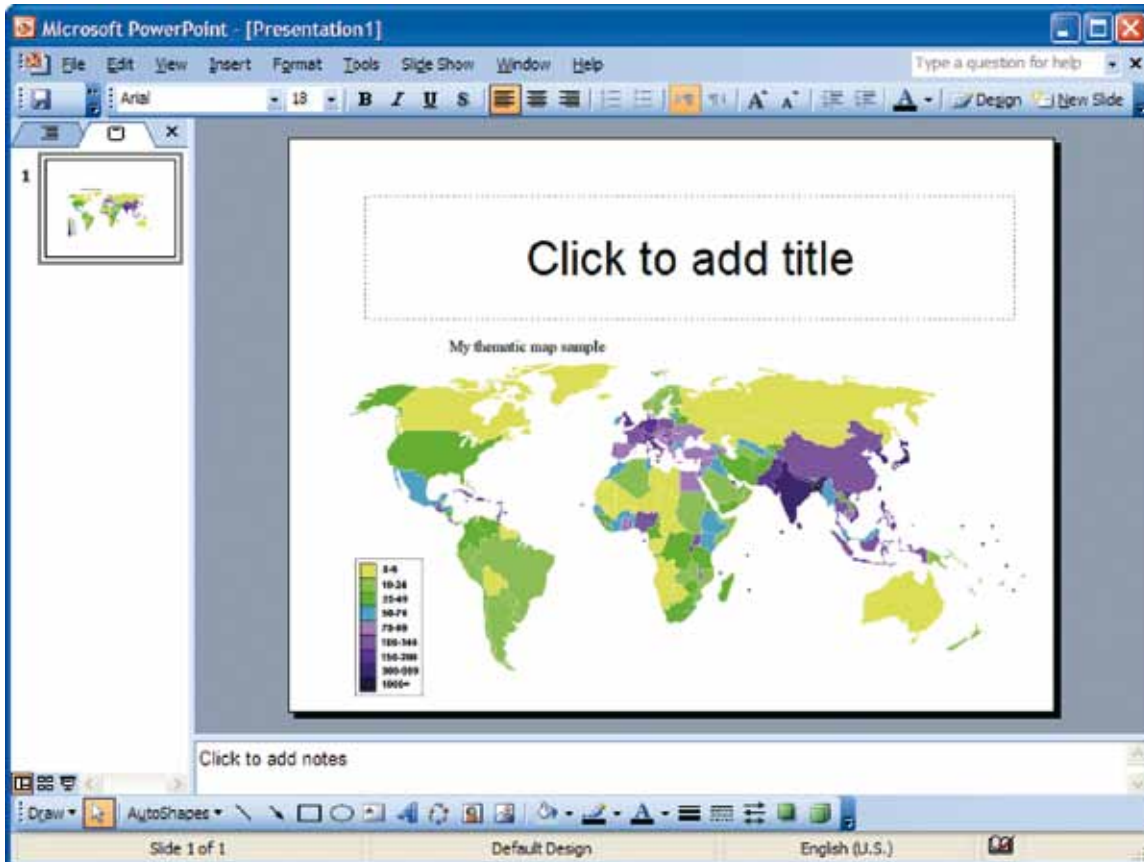

- 1 Load base map
- 2 Load data
- 3 Define a cartographic display
- 4 Configure annotations

## 1 2 3 4 5 TMap Designer Process

Copy - Paste (ex: MS PowerPoint)

### Technical facts:

- Platform-independent (Windows/Linux/Mac OS)
- Free of use and distribution (LGPL open source license)
- Reference: World Health Organization

TMap provides **open, flexible & easy to use** solutions to create your thematic maps.
